

Hygiene Pulp™

A patient and staff friendly solution

Proper patient care is a high priority for all healthcare employees. A comprehensive range of patient friendly Hygiene Pulp™ is now available from Curas and it provides many benefits to healthcare workers and patients throughout the world.

The risk of cross contamination is real and significantly increased when using re-usable alternatives, irrelevant of how carefully they are washed and decontaminated. By contrast, our hygienic pulp products provide improved standards of care and help to eliminate HAIs (Hospital Acquired Infections).

Besides being single use, hygienic pulp products provide extra comfort and safety to both patients and staff. In fact, each hygienic pulp product costs less than the total cost of handling, washing and sterilizing the re-usable alternatives made from either steel or plastic. Switching to the Curas disposable pulp range provides you extra safety and convenience, at no extra cost.

- Helps to reduce HAIs
- Increases convenience for nursing staff
- Improves patient comfort
- Cost effective

The diverse range means you can use our Hygiene Pulp™ products to carry out a wide variety of procedures. The range provides great versatility for nursing staff. Products are easily stored and can be effectively disposed of. Good insulating properties of the product mean water is kept warm and comfortable to use.

Anxiety amongst patients is a real factor in the healthcare environment and this can be reduced by using our Hygiene Pulp™ range of products.

Trays & Bowls

100% Recycled Material
100% Biodegradable
No Colour Added

Patients actually prefer hygienic pulp products for a number of good reasons. It is always comforting for a patient to know that no other contamination could have taken place before using the dish, bowl or tray. Cold and rigid stainless steel alternatives are significantly less comfortable to handle and use. In comparison, the pulp material is always clean and nice to touch and use. In addition, pulp is biodegradable, and is made of recycled paper without colour added.

Hygiene Pulp™

First Comes Trust™

Your safety is ensured by each device being produced in accordance with the key international standards MDD2007/47/EC, ISO9001:2008 and PAS29:1999 (fluid resistance test).

At Curas we say: "First Comes Trust" and this reflects the Curas approach and commitment to deliver uncompromised quality and trusted products.

The Curas Hygiene Pulp™ range is tested to ensure all products can be easily disposed of using all types of macerators for optimal environmental waste management.

Note: Product information is subject to change, please refer to www.curas.com for latest updates.
